Meeting Report

The 3rd International Conference on Artificial Intelligence and Machine Learning (AIM-2026), organized by USG United Scientific Group, will bring together researchers, academicians, industry experts, and artificial intelligence professionals from around the world on April 27 - 29, 2026, in San Francisco, California, USA.

The three-day scientific program will feature distinguished keynote lectures, invited talks, oral presentations, and poster sessions, highlighting cutting-edge research and innovations in areas including:

- Artificial Intelligence and Machine Learning Algorithms
- Deep Learning and Neural Networks
- Generative Artificial Intelligence and Large Language Models
- Explainable and Responsible Artificial Intelligence
- Natural Language Processing and Computer Vision
- Artificial Intelligence in Healthcare, Cybersecurity, Robotics, and Industry
- Intelligent Systems and Autonomous Technologies
- Data Science, Big Data Analytics, and Emerging Artificial Intelligence Applications.

The conference will offer valuable opportunities for knowledge exchange, collaboration, and networking among researchers and industry leaders. The presentations will showcase innovative artificial intelligence solutions and applications shaping the future of intelligent technologies.

We sincerely appreciate the contributions of all speakers, session chairs, presenters, and participants who will make AIM-2026 a successful global forum for artificial intelligence research and innovation.

The conference proceedings will be published through USG Conference Proceedings, highlighting significant contributions to artificial intelligence and machine learning.

Join us at the 4th International Conference on Artificial Intelligence and Machine Learning (AIM-2027) on April 26 - 28, 2027, in Orlando, Florida, USA.

We look forward to your valuable participation and contributions!
